Sir:

Responsive to the Office Action mailed on January 29, 2003, please amend the above-identified application as follows:

In the Specification:

Please replace the paragraph on page 8, starting at line 1 and ending at line 9, with the following:

A1  
--In Fig. 1, after 3, at 4, following the envelope information 40, n 36, after being converted to an email packet, is transmitted back to the mail server 16 because it was not successfully sent to the plurality of the fax machines 12. Next, at 5, n+1 38, which is converted to an email packet at 30, is sent back to the mail server 16. Once all of the email packets have been re-directed to the mail server 16, an acknowledgement is sent to the mail server to inform the latter that there is no need for re-transmission of the original email message 18 back to the router 14, otherwise, such as re-transmission will occur. In fact, the next time the mail server sends the email packets for transmission to the fax machines, they may be directed to a router other than the router 14.--
